KURO TECH (쿠로테크) · SEOUL, REPUBLIC OF KOREA

Capability Statement

Overview

Kuro Tech provides on-site field deployment, smart hands, decommissioning and forward-deployed AI engineering for international companies operating in Korea. Registered Korean business, English/Korean bilingual, Seoul-based with nationwide dispatch.

Core capabilities

- Network hardware install/swap (switches, routers, firewalls, APs)
- Rack & stack, cabling, patching, labelling
- Desktop/laptop deployment, imaging, IMAC
- Data-centre remote hands and parts replacement
- Decommissioning and ITAD: de-racking, data erasure, licensed recycling
- GPU data-centre deployment: racks, transceivers, fibre at scale
- LLM application deployment (Claude, OpenAI, Bedrock, on-prem), RAG and agents
- Korean-language data pipelines and evaluation
- Managed IT retainer for foreign offices

Differentiators

- Registered Korean business; tax invoices (세금계산서) issued; USD invoicing available
- English-first reporting with Korean on-site liaison
- No visa sponsorship required; same-week availability
- Photo/serial close-out on every job
- One engineer covering both infrastructure and AI deployment work
